

4th Generation Lyme Treatment

20.10.16.note

During the last 18 months, I have made some important breakthroughs which make my Lyme treatment simpler, less expensive, and more powerful.

1. I have developed much more powerful anti-Lyme remedies.
2. I have freed myself of Lyme disease. (See Appendix)
3. I have helped a local medical doctor with Lyme disease and tuberculosis - quite a serious combination - become free of both.
4. I have developed a powerful new Lyme treatment which is delivering good results with other people.

Background

For those who don't know my work, I am a physicist who has been developing a system of energy medicine for the last 30 years. I am working with an advanced form of living physics which includes spirit (ie the life force). So this is also very advanced spiritual healing, since living physics is the science of spirit (eg the Unified Field) and life, and hence much closer to the real truth than existing science. Over the last five years I have developed Lyme treatments and eliminated it from myself.

Why Physics?

People ask me about the nature of Lyme disease. Is it genetically modified? Is it biological warfare? In a sense it does not matter. The fact is it exists and we have to deal with it. There is evidence that it is genetically modified - hence the physics. Physics is more powerful than chemistry!

How to cure Lyme

The people who get the best results with Lyme are those who have that inner fire that they are going to do whatever it takes to get rid of it. A key factor is spiritual awakening. This is why my remedies are so important. They boost your inner fire. They are spiritual remedies which awaken you and boost your immune system, to the point where you become invincible, and the Lyme goes. (NB This is easier for some people than others.)

My remedies are non-chemical, being energy medicines made from flower essences, crystal and mineral elixirs. They are a major extension of homeopathy and the Bach flower essences, which have served humanity well for a hundred years. However, they are not made from individual flowers or minerals, but are combinations of flower and/or crystal essences (like the rescue remedy), and some are even combinations of combinations. This enables me to make remedies which are highly focused (like a rifle bullet) and so more powerful, or covering a broader range of symptoms (a bit like buck-shot), and even combinations of both approaches. Furthermore, my remedies are made to work on the higher dimensions of matter up to the 28th dimension (as in string theory). All of these techniques make them considerably more powerful than flower essences, such as those of Dr Bach. Furthermore crystals and minerals are more powerful and mathematically precise than flowers, and I use these extensively. The physics gives this system a precision and power no purely intuitive system has.

Whilst my main focus was originally to develop a system for chronic disease, I also started to develop remedies for the immune system - because the body is built around it. Already in the 1990s I was developing remedies to boost the immune system to help someone with HIV in California.

As a result of this work, I caught drug-resistant TB from an AIDS patient, and after a struggle, I got rid of that - it took about 6 months. I then had a project treating children with HIV in Thailand (two became free of it), from which I learnt a lot, especially about TB,

which I caught (and got rid of) many more times. In the following years, I had a number of viral, bacterial and fungal infections, and developed treatments for these including EBV, CMV, Coxsackie A and B viruses, H1N1 (swine flue) and other viruses; also bacterial infections such as strep, staph and anaerobic bacteria, diplococci and Lyme disease; and candida and other fungal infections. Also other infections not listed.

The two most serious infections I had were TB, and then later Lyme together with a type of Coxsackie virus (mood virus). It took 6 months to get rid of drug-resistant TB, and about 3 years to overcome Lyme with that virus. *I have now had Lyme five times and this has enabled me to perfect the treatment for it, and free myself.*

The previous versions of this Lyme treatment helped people, but ran to 20 boxes of remedies, which became very complex and unworkable. It overpowered the Lyme by being even more complex than the Lyme! The challenge has been to find Borrelia's weak points, so that the treatment can be simplified and made more powerful. I have now done this.

Breakthroughs

During the course of this work, I have made about 800 remedies with anti-Lyme properties. However, the real breakthroughs have been to find key types of remedy which are much more powerful against Lyme:

1. Lyme causes the immune system, to collapse and then you are helpless to defend yourself, and start to fragment along lines of weakness. People have different weaknesses, and so fragment in different ways - hence the different symptoms. Nature taught me about the various ways Lyme causes the immune system to collapse, in a peculiar way. I was at a friend's house near Woolmer Forest and found a tick on her cat. She removed it efficiently, put it on the kitchen table and it started to walk! I thought this was not a good idea and squashed it with my thumbnail - and got ticked off for this (sic). My friend cleared up the mess and put antiseptic on everything and I went home. Half an hour later I started to feel queasy. I got my Lyme test remedies and started testing myself. I found I had Lyme spirochaetes on the outside of my thumbnail (I swear they were trying to bore through it). They were also causing my immune system to collapse (presumably energetically) in several different ways, which I was able to identify with my remedies. For example, one way was to break the unity of my being, in effect breaking the link between my mind and God, so my immune system collapsed. There is more to this - see the section on Mercury below. (After testing, I put my thumb in hot bleach and killed the Lyme - very satisfying.)
2. Remedies for unity are important against Lyme, but they are not the whole story. Perhaps I should explain what the objective is: If you have Lyme disease, you have to get back control of your mind and body, and the Life Force can do that. Materialism (the idea that matter is king) is wrong - it is a form of slavery. It is you as consciousness, love and spirit (all aspects of the Life Force), which has to get back control. *Once you are filled with enough light the Lyme will go.* So to find the most powerful remedies to do this, I went through my research and found that remedies which line up all levels of spirit had played a key role in saving my life in the early days of Lyme. By lining up all levels of spirit into key parts of your body which Lyme likes to dominate (eg brain, nervous system, intestines, joints, DNA, immune system, glands, etc), it is possible to force Lyme out of your spirit and from those parts of your body. These remedies overwhelm Lyme in their particular areas.
3. The next breakthrough came from my work trying to rebuild the body from damage from chronic disease. Even though I knew a lot of leading edge physics I had not quite realised that there are two different types of matter in the body, and two different types of Lyme disease. There is evidence in physics for another type of matter - dark matter, and even theories of it. But it took me a long time to realise that

this matter is in the body (in another space with a different time dimension).

Basically the Universe is alive and dual, a bit like a computer with software (consciousness) and hardware (matter). This duality is reflected in the body, but not just as matter and spirit. *There is also spiritual (etherial) matter*, which actually forms the under-pinnings of the normal matter in your physical body. Lyme disease exists in your normal matter (as spirochaetes) and also as a separate disease in your etherial matter. So when you take antibiotics, they kill off the spirochaetes, *and it retreats into the etherial matter*, where it hides until it is safe to come back. It then comes back worse than before, unless you attack it with my remedies which eliminate it from etherial matter.

4. How to do this? Jesus explains (in *Love without end: Jesus Speaks* by Glenda Green) that the adamantine particles (sub-quarks) respond to love. I have known for a long time that diseases such as TB steal normal adamantine particles from you, and the way to get them back is with love and triune energy (like Christ energy). What I had not realised was that Lyme and other parasitic diseases steal your etherial adamantine particles. Again the way to get them back is with love. So I made a whole series of LEAP (love and etherial adamantine particles) remedies, and the Lyme can't stand them! They completely zap it, at least at this etherial, parasitic level. It seems that other parasites live in this etherial matter. The main difference is that parasites live on you, whereas Lyme takes control and forces you to play a secondary role, more like a state of living death. *The treatment will enable you take back control* - it helps if you are determined in your heart and soul to do everything necessary to win and become free of it.
5. Mercury. Lyme steals your gold, which is a trace element used to build your brain and nervous system, heart and immune system. So by taking your gold particles, it starts to break down your personality, immune system and body. However, it also makes lead and mercury (possibly alchemically from your gold). It then uses lead to poison your nerves, and mercury to poison your joints. I had known this for some time, but it is, worse than this. I was recently researching EBV and found that mercury can get into the corpus callosum (bundle of nerves between the left and right brains) which disconnects your immune system from the higher levels of spirit and causes your immune system to collapse. *It turns out that Lyme puts mercury into the corpus callosum, thereby doing just that.* I now have remedies which remove the mercury from the corpus callosum, reconnect you to spirit and turn your immune system back on, and hence in your pancreas and abdomen.
6. There are many other smaller breakthroughs.

Treatment of Lyme

The treatment of Lyme goes through several stages:

1. At the beginning, Lyme tends to be out of control. The first step is to break its back, weaken it and turn it around. The new treatment is powerful enough to do this for many people, although some may require boosts. When this happens, a major part of the spirit of the Lyme will leave. A few people may experience this as a hideous dark entity coming out of them. For example, I once saw a hideous face with a piercing blue eye come out of my abdomen, as the spirit of the Lyme was weakened and left me. Don't worry if you don't experience something like this, as long as the Lyme is weakening. This is the first stage to defeating Lyme.
2. You then go into an intermediate period where the symptoms are weakening. The symptoms should continue to weaken. You need to persist. If some symptoms do not weaken, possibly because they are specific to you and not covered by the standard treatment, then you will need boosts. I have 800 anti-Lyme remedies and thousands of other remedies including mental and nervous problems, and so on to help. Remember these are soft healing treatments.
3. As the symptoms fade away, it is possible that the Lyme will become dormant in the

left foot knuckle (it is a yin or female disease). There are remedies in the treatment to get it out of the left foot knuckle, and so get rid of it completely. However, one needs to check this is happening (eg pulse testing) to make sure the Lyme has really gone. If not, boosts are necessary.

Treatment of Other Infections

In order to make your immune system strong enough to eliminate the Lyme, you often have to boost it against other infections, which may be causing immune suppression potentially blocking the Lyme i-treatment. In fact, often these go before the Lyme. Other infections can be divided into two categories. There are the normal co-infections, such as Bartonella and Babesia (I have treatments for these) which come from the same tick bite. In most cases, these are best treated with Lyme from the beginning or at least early on.

Other infections (eg viruses, TB, etc) can complicate the treatment, because they are often immune suppressive and may also steal (etherial) adamantine particles. Some infections are more serious than others. A strategy has to be developed to treat the ones you have. In some cases it may be important to treat these first. But the new Lyme treatment is sufficiently powerful that it is often best to start with the Lyme treatment, either alone, or with treatments for some of the more serious (eg TB or viruses) infections.

Some people have many other infections because the Lyme has destroyed their immunity. I call this Lyme Immune Deficiency Syndrome (LIDS). It can be treated, but it is more difficult to do so.

New Lyme Treatment

This is a 4th generation treatment is simpler and more powerful than previous treatments. The standard treatment gets at the inner core of Lyme - it consists of 6 boxes:

1. This first box contains 16 remedies to remove heavy metals and mercury, and detoxify the body. Also to get the mercury out of the corpus callosum, balance the left-right brain, and rebuild the immune system there. It also helps you absorb gold particles (provided you also take colloidal gold) and rebuild your body and personality to fight spirochaetes.
2. This box restores the unity of your being, including your connection to God, and reverses collapse of your immune system from this and other ways. It also rebalances your immune system in your brain and abdomen and in certain crystalline structures in your body. It boosts the Tree of Life, thymus and mind of immune system. It also brings in love from a very high level to reverse chronic disease caused by Lyme.
3. The third box is exclusively LEAP remedies which push out Lyme and reconnects you to the etheric foundations of your body, especially in your brain, pituitary gland, immune and nervous systems, red and white blood cells, etc. The LEAP remedies stimulate the absorption of particles of platinum, so you need to take colloidal platinum. LEAP remedies are profoundly anti-Lyme and help you resist other new infections.
4. The 4th box contains remedies to line up all levels of your spirit and put unified spirit into your brain, spinal cord, immune, endocrine and nervous systems., intestines, DNA, meninges, white blood cells and joints. These literally force Lyme out of these and other areas.
5. In order to overcome Lyme, you have to get it out of your brain and nervous system (because these control the immune system). This box of remedies focuses on doing this. It boosts your immune system in your brain, central nervous system, spinal cord and nervous system. It gets lead out of your nervous system, and stimulates nerve regeneration. It also boosts brain cells and switches the brain (at DNA level) out of the destructive state caused by Lyme, into the positive constructive state to rebuild yourself.

6. This contains several different types of remedies, including all levels of spirit remedies, which could not go into the other boxes (eg for cell division, optic nerve, etc). It contains remedies for gaps where Lyme likes to hide (eg joints, synapses) and boosts for macrophages (white blood cells which clean out cavities). It contains remedies to dispel spells, push out the most intense negative energies, and protect against psychic attack (eg from Lyme). It also boosts the immune system in the bone marrow, bones and skeleton. Also remedies to line up the life force in the joints and feet. It also contains a remedy which links all levels of the spirit and LEAPs, which helps bring you back to life.
7. The Babesia treatment is technically part of the Lyme treatment, even if you do not have Babesia, because they both damage red blood cells. There are two versions:

BABox If you have TB, then you need this. It is half a box of remedies, two of which are specific for Babesia, the rest get both Lyme and babesia out of the red blood cells. In this case you will also need treatment for TB.

BABox+ If you don't have TB, then you need this boosted version which contains all the Babesia remedies, plus TB remedies which have powerful anti-Lyme properties. You may need other boosts - see below.
8. This standard treatment includes three other items:
 - . 250 ml colloidal gold
 - . 250 ml colloidal platinum
 - . A remedy for WBCs & spirochaetes (LY725), which helps your white blood cells overcome the energy field around spirochaetes, so they can destroy them. This remedy has to be taken every day at least once and more often if you want. So I supply it in larger (30 ml) bottles.

Treatments for Co-infections

The main co-infections are Bartonella and Babesia (see above):

- BRTBox This box is the treatment for Bartonella, and also for general bacteria and anaerobic bacteria. Remedies are available for Ehrlichiosis and Mycoplasma.

Treatments for Other Infections

I have treatments for 20 or 30 other infections. The Candida treatment is particularly important for those who have had extensive antibiotic therapy and developed drug-resistant forms of Lyme.

Lyme Boosts

There are two types of boost:

1. General anti-Lyme. The doctor who had TB, took the above 6 boxes plus two for TB. Some of the TB remedies had anti-Lyme properties. However, if you don't have TB, then they would not help so much. So spirit helped me select:

Box 7 which has some of the most powerful anti-Lyme remedies (out of 800) not included in the above treatment Clients have told me they can feel the power of this box against Lyme.
2. Tailor-made boosts: Lyme is different for everybody, and so you may have problems not covered by the standard treatment. For example 8% of Lyme patients have heart problems - I have remedies for this. Or you may be developing multiple sclerosis, or have worries about cancer, or eye or teeth problems, or your symptoms in one area may be much worse than average. I can provide a wide range of boosts from the thousands of remedies I have, including 700 anti-Lyme remedies not in the treatment. Thus this is a comprehensive Lyme treatment.

Results

Clients are telling me they are feeling stronger and more energetic, and their symptoms are weakening: One woman who helps run a 4000 acre farm (really, they employ about 300

people growing vegetables) has continued working, despite the Lyme plus other infections, and has recently gone on holiday for a week. She says “Brain fussiness better. Words I still cannot find sometimes and still getting pressure in head and eyes, BUT not nearly as bad as it was. Also pins and needles or should I say electric shocks, but again not so bad. Tiredness and nausea comes and goes. It depends which boxes I am taking. I have decided to take the co-infection boxes. The boosts and the inflammation with me when I go on holiday? Do you agree?” In fact she took boxes 4, 5, 6 and 7.

It has also freed two people, myself and the woman doctor. Her grandfather had been a TB doctor and he seems to have brought TB home, so it was in her family, and she inherited it. Furthermore, she caught TB a number of times during her work as a medical doctor. So the TB was very deep in her. Getting rid of the TB and Lyme at the same time, shows just how powerful these new methods are.

Appendix A: The Evidence that I have become Free of Lyme

The evidence is a bit technical. You need to know that I have a system of pulse testing. This is a bit like muscle testing (kinesiology) except that it is based on the heart muscle (and so unbiased by the brain). Anything which strengthens you will give a stronger pulse (peak to peak). I use this testing to design and make remedies, to decide whether to use remedies, and to detect the presence of infections, specifically the energy (life force) of the infection. This is much more sensitive than any laboratory technique. Lyme can normally be detected at the head (6th chakra), abdomen (2nd chakra), joints and other places. As the immune system is boosted, it will become weaker until eventually it becomes dormant. It can then only usually be detected at the arch of the left foot (I have observed this happening in several people). It will often remain dormant for months. If it starts to activate, the remedy LY725 will usually make it dormant again.

Two or three years ago, I went back to very intensive healing of past life problems. Lyme was still dormant at that time, and occasionally this intensive treatment would push the Lyme to the surface. It seems that (dormant) Lyme was hiding in the darkness, and as the light came in, it would push the Lyme out. However, to be freed, it has to be eliminated completely, even from the left foot, which the new treatment will do. The evidence I have got rid of it is:

1. Lyme is undetectable anywhere, including at the my left foot, and has been for over 20 months.
2. The symptoms of Lyme have gone away: brain, nervous system, digestive tract and joints all normal.
3. I no longer think about Lyme. I am not worried by Lyme. (I know that if I was ever reinfected, I can zap it.) I am not afraid of Lyme. It no longer influences my mind, emotions nor will. The absence of mental symptoms is very significant.
4. These results apply to the doctor who has been freed of Lyme and TB.

Since I have eliminated Lyme, there has been no sign of it. The Lyme really has gone completely.
