

Instructions for Taking Lyme I-Remedies (4th Generation)

17.5.17.

Warning

1. **Coffee:** Coffee, camphor and mint can weaken and even block the action of vibrational i-remedies. *Do not drink coffee during the course of the i-treatment.* Tea is all right. Do not take the i-remedies whilst drinking.
2. **Meals:** Do not take i-remedies during meals. It is better to take i-remedies 15 to 30 minutes before meals and 30 or more minutes after meals, but if you are in a hurry, closer before and after meals is possible. Do not take i-remedies whilst eating.
3. **Viruses:** Viruses, such as EBV or CMV, can block the Lyme i-treatment. It is important to be tested for viruses and other infections so you can treat them.

General

4. **Dose:** A dose is about 5 drops (3 to 7 drops) placed in the mouth, on the tongue or under it. The i-remedies are liquid consciousness in pure water and so it is not possible to overdose on them. However, taking too much wastes it. It is more effective to take smaller doses and repeat them more often. This is quantum healing.
5. **A Row:** I-remedies are placed in rows of 5 or 6 in a box (the 6th i-remedy being on top). One normally takes a dose of each i-remedy in the row, one after another until all 5 or 6 are taken. Put the drops of each i-remedy directly in the mouth, on or under the tongue. Do not mix several together in water, because this can change and weaken their properties. Put each one directly into the mouth, and then the body will handle the different vibrations differently according to different laws not understood by science yet. Note: the first one or two doses normally produces more noticeable reactions. (Some sensitive people may like to take one i-remedy at a time for the first one or two doses, to see what they do, but this takes more time and is not essential.)
6. **A Box:** A box contains 15 to 18 i-remedies, in three rows of 5 i-remedies each, plus a few i-remedies on top. The i-remedies on top should be labelled with a row number (1, 2 or 3), and should be taken as the 6th i-remedy in that row.
7. **Taking a Box:** If you want to take one box per day, then you can take the front row in the morning, the middle row in the afternoon, and the back row (ie closest to the hinge) in the evening, and so work through the whole box in one day. So each i-remedy in the box gets taken once during the day.
8. **Taking two boxes per day** Normally for Lyme the i-treatment is complex and so one takes two boxes per day (possibly more in certain situations). For example, the first row of the first box in the early morning, then the second row later in the morning, then the third row before or after lunch. Take the first row of the second box after lunch to mid afternoon, the second row later in the afternoon, and the third row in the evening. In this way, each i-remedy in each box is taken once per day. If you have to go out to work during the day, then you could take one box before you go to work, and the second when you get back. The timing of when you take the i-remedies is not critical. It is better to take them at irregular intervals than not to take them at all.
9. **Taking a Whole Box** Normally one takes one row (5 or 6 i-remedies) at a time, as above. However, if you have worked through all the i-remedies at least several times, so that the healing reactions have faded away, then those who are spiritually strong enough could take a whole box (15 to 18 i-remedies) at one sitting. There are pros and cons of doing this, for example if you are very short of time, or you want to boost the treatment. It is up to you. Don't take a whole box for the first few times, or if you are not strong enough.

Lyme and Co-infections I-treatments

The Lyme i-treatment for the inner core of lyme (ie basic treatment) consists of 6 boxes plus 1 for Babesia and lyme combined. The lyme treatment is modular and there are additional boosts which can be tailor-made for your symptoms. For example, I have boosts for the heart, the joints, the nerves, the brain, the intestines, and so on. I have about 800 anti-lyme i-remedies and can help many different peculiar symptoms it may produce. The complete treatment is consists of a three-pronged attack:

1. Inner core lyme treatment of 6 boxes plus 7th box for Babesia. (NB if you have Coxsackie viruses or the mood virus, then there is a different version of the Babesia box.)
2. Take boosts as required for the symptoms and conditions lyme causes in you.
3. Take treatments for co-infections (eg Bartonella) and for all the other infections you have (eg viruses, bacteria and fungal infections, since these can block the immune system. Most people with lyme and other infections, will require the multiple infections box, which helps your immune system recover wafter it has been broken down by several different types of infection (eg bacterial, viral and fungal). All these treatments boost your immune system in different ways against the target infection. As your immune system gets stronger, the infections will go - and you will not only be healthier but also stronger, because your immune system will have forced the infections out.
4. In addition you need to take colloidal gold and colloidal platinum every day plus LY725. My remedies stimulate the absorption of c-gold and c-platinum and the treatment is much more powerful if you take a dose of these every day, possibly even a dose with each box. You can obtain these from www.purestcolloids.com in the US. Please note, if you take these colloids without my remedies, they could have an adverse effect, because Lyme, left to its own devices, steals gold and I believe converts it in mercury and lead to poison you. When taken with my remedies they reverse this process and rebuild your immune system.
5. Lyme spirochaetes normally hide. When you take my remedies, they are often forced out of hiding and move around the body to find new hiding places. However, they have an energy field which protects them from being attacked by your immune system. LY725 boosts your white blood cells to overcome this energy field sand destroy Lyme spirochaete. So if you take this remedy every day, it helps lower the spirochaete numbers.

You can take the full i-treatment in several different ways. This is spiritual healing and so you can follow your inner guidance (intuition).

Nature of Lyme

Lyme is like no other disease, possibly because it seems to have been genetically engineered. Some people say it is like syphilis which also causes arthritis, but it is only a bit like syphilis. Some say it is like tuberculosis in its ability to hide, but it is only a bit like TB. Some say that it is a parasite, and this is true, but it is not like any other parasite. The main peculiarity of Lyme disease is its complexity. It is incredibly complex on spiritual (consciousness) levels, AND on physical levels.

I have considerable experience treating and curing drug-resistant TB, and the Lyme i-treatment is at least 5 times more complex. TB has a specific mission from God, to force the sick person to create the correct balance between love, spirit and matter. Lyme, however, is so complex, that for a long time I thought it did not have any specific mission from God. It just seems to overwhelm one and create more and more chaos. However, I have had a bit of a breakthrough.

I have found that there is a connection between faith in God, and the foundations of

your immune system in your brain and heart. Lyme destroys one's belief in God and so disconnects Him from the root of your immune system. It thus destroys the unity of your being, and your immune system collapses. Lyme then takes over and has so much control that it can do almost anything. It can cause the body to fragment, and all kinds of other complex conditions, as is well known. In the process, you lose control and it starts to force you, as spirit, out of your body. So the lesson God wants you to learn is to reverse this process. He wants you to have faith in Him, start to rebuild your immune system, fight off all this disease and so put yourself back into your body so that you are reborn of water and spirit.

The breakthrough is that I now have the i-remedy which reconnects you to God and rebuilds your immune system in your brain and heart and DNA. My other i-remedies help to bring your spirit, your life force into your body so that you are reborn, because they are the essence of life. They are patterns of pure consciousness imprinted into water. So they are totally non-toxic and can be combined together to create more powerful i-treatments.

It is important that you are not overwhelmed by the number of boxes. The reason for the large number is specifically because it is only by attacking the Lyme from so many different directions that it weakens and goes. This is a formidable foe, but it is not invincible. The thing which it dislikes the most is if you re-establish your unity and attack from many different directions. So please find a place where the boxes can be placed in order, and mark the next box you are going to take with a peg (eg a pencil) or otherwise.

Other Infections

I have i-treatments for other infections as well. It is often a good idea to treat other infections first, because they can weaken the immune system and so weaken or block the Lyme i-treatment:

1. **Bacteria:** Staphylococcus, Streptococcus, MRSA, etc.
2. **Viruses:** Epstein Barr virus (EBV), cytomegalovirus (CMV), Coxsackie A and B viruses, the "mood virus" (which appears to be an unknown Coxsackie A virus), HHV6, herpes 1 and 2, H1N1, influenza, gastrointestinal virus, etc. It is particularly important to treat certain viruses, such as EBV, CMV and Coxsackie viruses before or at the beginning of Lyme i-treatment.
3. **Fungal infections:** Candida can vary from mild to systemic. I have several i-treatments which cover this. Systemic candida is often a problem after antibiotic i-treatments, so it is often a problem with drug-resistant Lyme.
4. **Boosts:** Other boosts are available.

Healing Reactions

My i-remedies are non-chemical and so non-toxic, and are very gentle. However, if they did nothing, there would be no point in taking them. Possible reactions are:

1. Tiredness - as the immune system kicks in and starts to work.
2. Nausea - this may be due to negative energies which are not pushed away properly. These can often be relieved by a shower or a bath.
3. Symptoms may get worse before they get better, eg as an infection comes out.
4. As the immune system turns on, it may start to attack and push out hidden infections.
5. Lyme is a complex disease and so you may get reactions peculiar to yourself. Sometimes these require a special boost to calm them down.
