

Lyme Testimonials

7.17.

Testimonials for the latest (4th generation) i-treatment are given in Part II immediately below. Testimonials for earlier generations of treatments, are given in Part I towards the bottom of this document. (For testimonials for the EBV and viral treatments, go to the home page and click on “references”.)

Part II: First Results of 4th Generation Treatment

I present testimonials from other people first, then for myself, just before Part I. Please note I have not been promoting this new treatment until recently. Please also note that God, in his infinite wisdom, has brought me more severe cases of Lyme, which I classify as LIDS (Lyme Immune Deficiency Syndrome). The new treatment is powerful enough to help them.

1. Dr BN, retired GP. Dr BN first asked me to help her treat tuberculosis some years ago, which I did. However, the earlier versions of the treatment did not eliminate it completely. In 2015 she was bitten by a tick, and asked me to help her. She tested positive for Lyme and TB and so had LIDS, because TB is also seriously immune suppressive. So I gave her the Lyme and TB treatments, plus treatments for Babesia and Bartonella. These helped but did not completely eliminate the Lyme nor TB. However, there was rapid development of the treatments at that time, so when she was bitten again in 2016, I gave her the improved treatments and after a few months she tested negative for both Lyme and TB and co-infections. I see her regularly and she has tested negative ever since, even at her left foot (see item 0 below). So she seems to have been free of both for nearly a year. She recently wrote:

“i. I am Doctor BN, MA(Oxon), BM Bch(Oxon), MRCGP, MFHom(Lond). I retired from my general practice in Hampshire, UK, in 2010. Formerly I worked in General Practice in partnership with Drs W., McG. W., E. and K., also in Hampshire, commencing 1981. I have practised as a medical homoeopath and trained at the Faculty of Homoeopathy, from which I qualified as MFHom, and practised in Guildford with Dr Andrew Lockie for many years and have been recognized as a provider by BUPA.

“ii. I have been acquainted with Dr Richard Ellis for 10 years.

“iii Dr Ellis is born into a well-respected local family, who have been millers at Headley Mill. He was educated at Churcher’s College and Oxford University. He pursued a distinguished career in physics research, before developing his system of quantum entropathy for healing. He has regretted the negative application of physics to nuclear weapons, and has devoted his much of his life to the positive application of physics as the healing power of nature, or quantum physic.

“iv. His work can be considered as a major extension of homoeopathy and Bach Flower essences. I have put some former patients in contact with him for healing with positive results.

“v. I have taken Dr Ellis’s remedies myself with good results. I have had two serious bites from deer ticks in the last two years and I consider that his remedies have helped me to remain free of Lyme disease (Borellia sp.).

“Signed Dr BN, GP retired.

Please note, I see Dr BN regularly and she remains free of TB and Lyme. She likes my remedies and continues to take them for other things. She says they are subtle, but deep acting and powerful.

[Disclaimer: results may differ from person to person.]

2. Ms SC, who works on a very large Farm in the UK, initially came to me with Lyme, 3 co-infections and EBV, and she started treatment for these. However, when she came for a consultation some months later, I found that she had had a total of 11 infections, including Lyme and TB. So she had LIDS. In December 2016 EBV and Bartonella were undetectable, and seemed to have gone. However, there were 8 other infections, 6 of which we had never treated. So she got the treatments for these. When she came to see me in March, we could only detect 4 infections, one of which (hepatitis A) was new. So we had eliminated, or rendered undetectable, 8 of the original 11 infections, leaving TB, Lyme and staphylococcus plus the new hepatitis A to be treated and eliminated. However, there is an additional complication (see below), and the work is ongoing. She writes:

A. Towards the end of 2016, she wrote:

“I was fortunate enough to come across Dr Ellis’s web site at the end of July this year (2016). I had just been diagnosed with Lyme Disease, 3 co-infections and EBV.

“I have been taking his I-Remedies since August 2016 and have found them both beneficial and remarkable in the way they help the Immune System to overcome Dis-ease and Viruses.

“I am not 100% well yet! But I have no doubt that I will be with the help of this wonderful Mans knowledge and insight into different way of healing the body.

“My main symptoms were from the Lyme Dis-ease -and I say Dis-ease, because this is what any illness makes the body and mind feel like, at dis-ease with oneself.

“Initially I had the following ;-

- Very bad cognitive issues-severe Brain Fog, inflammation, not only in the brain, but in various areas of my body
- Pins and needles all over the body- which were like someone giving me a constant electric shock
- Word finding difficulties
- Headaches, but all over the head, like my brain wanted to burst through my skull
- Severe nausea
- Disorientation
- Pain in legs, hands and feet
- Whole body in balances
- lack of energy
- apathy towards doing anything at all
- weight loss
- EM Rashes

“Since taking Dr Ellis’s I-remedies many of these have subsided significantly in only 11 weeks!!!

“I am left with some residual pain in joints and skin, which we are working on. Some head pain, but much less and not constant, and some rashes.

“Dr Ellis will work with you, just trust his in-ate ability to be able to get to the root of the

cause, and believe that you body can and will get better. Because with these you can.

“Kind regards

“And thanks as always

“Suzie

B. “The main symptom is the pain in and around the leg I was bitten. Left leg.

“Brain fussiness better. Words I still cannot find sometimes and still getting pressure in head and eyes, BUT not nearly as bad as it was.

“Also pins and needles or should I say electric shocks, but again not so bad.

“Have terrible pain in left jaw. But have suffered with TMJ since I had all my wisdom teeth out at 19. The Lyme does seem to be aggravating it. And probably the fact that I am tense a lot in the neck and jaw.

“Tiredness and nausea comes and goes. It depends which boxes I am taking.

C. “I STARTED box one yesterday and my spirit already feels different. I have been doing a lot of meditating and asking for love in God and the arch Angels. Which I will keep doing.

“I also read through all your literature last night. I found the bit on “life” so true and profound. I am going to try to get the book.

“Thank you thank you thank you!!!

D. Complication. She was bitten by the tick in her left leg. However, she continues to have pain in her left leg and was able to determine in March that this came from a trauma with no known cause (some people would classify that as a past-life trauma). I was able to provide a treatment for this, and the pain decreased significantly. However, the pain has not gone completely, and the Lyme seems to be hiding in it. This is an additional complication to the 12 infections mentioned above. However, she has got rid of 8 of these infections, and is determined to get completely well. So we are continuing to work on this. It is also a busy time of year on their huge vegetable farm which employs hundreds of people., and so she has been unable to get away to see me. She runs the Farm office and does the payroll for 250 people each week. She said to me recently “In 10 months I have gone from thinking I was going to die to functioning normally (ie running the Farm office) with a bit of pain.” She is helping me develop a more powerful version of the treatment.

Others to follow

0. Myself: I became completely free of Lyme when I finally got it out of my left foot. As the immune system is boosted, Lyme gradually retreats to the arch of your left foot, where it can become dormant As long as your immune system remains strong, it will remain dormant there. However, if it weakens, then the Lyme will come back. I became completely free of Lyme when I could no longer detect its energy anywhere, even at my left foot. I lost my fear of Lyme, forgot about it and went back to healing my past-lives. Despite my immune system going through some weak patches, I have not seen any signs of it since the winter of 2015-2016.

Part I: Testimonials from Earlier Generations of the Treatment

Here are some testimonials from clients who took earlier versions of my Lyme treatment. These treatments were more complex (12 or more boxes of remedies) and less powerful than the current 4th generation treatment. Nevertheless, they produced some good results, as the testimonials show.

The case of Mr PS

1. Mr PS came to see me because he could no longer work. His employer had given him extended leave for him to sort himself out, but he has was having real difficulties doing this because he had HHV6, strep, EBV, a gastrointestinal virus, candida and Lyme. He was of Buddhist persuasion and took to my methods. At various times he said to me:
"I have a very hard time concentrating and thinking logically."

"The combination of your i-remedies and B12 under the tongue lifted most of my brain fog in about 9 days."

"I have more use of my mind. It no longer feels full of concrete."

He held onto his job and eventually went back to work. Later, when I tried to contact him, he left a message on my answering machine:

"I am sorry I have not got back to you before, but I have been so dogone busy."

[Disclaimer: results may differ from person to person.]

2. I have received the following email from a client **Ms AT** who previously bought my Lyme i-treatment:

"Dear Dr Ellis,

"I think I might start calling you King Richard! This is nothing short of a miracle!! . Having been bed-ridden 90% of the time and on Morphine for pain for the past 18 months; after TWO weeks of your i-treatment I have got clarity and my brain back, have energy, am up and about (getting showered and dressed!), have much less pain and feel hope for life!

"Everything is better and I'm feeling like the old me again! Thank you SO much!! . . I don't feel like living death anymore. In the last week I've gone from sleeping 14-18 hours a day to 6-8 . . My creativity is back and flowing and I'm designing again.

"I'm still weak and my ankles are still a little bit sore but I'm so much more mobile and I even took the dogs for a walk with the children at the weekend.

"Am having a bit of a healing reaction at the moment with sneezes, streaming nose and temperature and I still feel better than I have done for YEARS! I'm so excited that my immune system is kicking in again. So fantastic! I haven't had a temperature since I first contracted Lyme 7 years ago. This is phenomenal!

"And I'm sure this is just the beginning of getting well . . As you said, I'm feeling reborn! There aren't words to express my joy and gratitude . .

"Thank you, thank you, THANK YOU!!

“Will speak soon,
“Lots of love from Asha, x

“Ps. If I ever win the lottery you are top of the list for a Large Gift!
“Pps. Please feel free to use this letter as a testimonial on your website.

[Disclaimer: results may vary.]

The next day MS AT sent me the following additional information:

“After 30 days of high-dose, IV antibiotics in hospital i was worse than ever with Late-stage Neuro Lyme. . Bed-ridden, feeling like 'death with a pulse', depressed and hopeless I discovered Dr. Ellis's new i-treatment. Sceptical, but desperate and with nothing to lose, I decided to give it a go. . TWO weeks in and I am dramatically improved- it's like I've been switched back on - less pain, more energy and brain fog GONE! . . I dont really understand it but it's WORKING!" . .

“Ms A T, Herts. Lyme sufferer for 7 years.

3. I received the following email in January from a client **Ms CJ** taking my i-treatment against Lyme:

“Hello Dr Richard,

“I just wanted to update you on my condition. Things are improving each day and I am slowly feeling like my old self again. I have more energy and I am doing more and more each day. I am learning my limitations and trying not to jump the gun with some things because I get tired really quick but just to be able to function through the day and do small things with my daughter has been such a blessing. I am actually going to the park with her in a bit and I am so thrilled to get outside with her. The pain in my right lung area is almost non existent and my stamina is coming back. I can't tell you what this means to me and how much I value your help and your i-treatment. I know God put me in the right hands and I am so hopeful for what's to come. I am juicing garlic, spinach, kale, and ginger and incorporating a very clean diet because I know how important this is. With all of that being said, I will need to place my second round of Lyme i-treatment I am hoping by the 1st of February. Please let me know how much it will cost for my second round so I can enter the correct amount in on your site and you know what to send.

“Please feel free to use my comments on your site or as needed for other patients inquiring about your treatment. Even though I am not finished I would like others to know that they have found someone very unique and special who actually helps to heal and cure sick people.

Thank you”
signed MS CJ

[Disclaimer: results may vary.]

Ms CJ emailed on January 18th:

“Yesterday was such an amazing day. I was up at 7 am juicing and had the energy to do a few errands. I felt more like my old self again. I may try to start some kind of exercise next week if I continue to feel like this but very easy though. I am going to get into yoga soon along with some light walking. I got up again early today and juiced for the whole family. It is so nice to have a little stamina again. Thank you.

Signed MS CJ

[Disclaimer: results may differ from person to person.]

Ms CJ wrote on January 27th:

“I am going to place my next order today. (She has so far been taking on part of the i-treatment. RE) Things are going very well. I started slowly working out again. I am walking three days a week at my favourite park on the nature trail with my daughter and I just started doing yoga three days a week. I am up in the morning juicing for my family, cleaning my house again, and getting out to do errands. I feel like I’m getting back to my old self again and it makes me so happy. I haven’t missed a dose of i-remedies either. Things are changing daily. I still can’t believe how sick I was for months. It is literally a night and day difference. I still feel it in my system a little bit but I pay close attention to things and I am so happy about my progress. Thank you so much for your i-treatment and being there for me.
Signed Ms CJ

[Disclaimer: results may vary.]

On February 13th Ms JC wrote:

“I received all 5 boxes and I’m finishing up my first round so it is good timing. Just wanted to update you and let you know I took my daughter to Disney World over the weekend. I wore her out I think. Usually it’s the other way around. I couldn’t believe the energy I had. I spent ten hours at the parks each day I was there. I could have walked all day. It made me so happy because that’s how I use to be before I got sick. I can’t believe the changes that have taken place over the last three months. I was in a bed for months unable to care for my child and now I’m doing cartwheels through Disney World! I’m so appreciative for your i-treatment and good health. I am diligent about my i-treatment and will continue to the very last drop. I am also keeping up with juicing, yoga three times a week and walking. Hard to believe I was in such an immobile state for so long. Life is so fragile and I am doing all I can to keep myself healthy. The Lyme and EBV is slowly losing it’s battle with me. It’s not an option for this to take over my body and slowly I am winning. Thank you, thank you!
signed MS JC

[Disclaimer: results may vary from person to person.]

More recently the mother of this young woman (Ms JC) told me that last Autumn her daughter was so ill she spent most of the time in bed. Now she is full of energy. There is a mountain outside their home which takes about 1 1/2 hours to climb. “Everyday she goes up there like a jack rabbit.”

[Disclaimer: results may differ from person to person.]

4. Recently Ms SC, a student who has been taking nearly all the i-treatment for some time, emailed me:

“hi Dr Ellis,

“sorry for not checking in in a while... I feel great. I haven’t had any symptoms for a while. I was pretty tired in January when I was at home but my energy has been surprisingly high and consistent since being back at school. I have all the i-remedies and I they through about four rows a day..

“Signed Ms SC
