

## Epstein Barr Virus and Other infections

25.9.14.

### Update

Since I first cured myself of EBV in 2009, there have been major improvements to the treatment, and I have developed effective treatments for a number of other infections. As a result, my website is completely out of date. The driving force behind this has been Lyme disease, which the author caught and which forced him to make major breakthroughs in rebuilding his immune system. I have also had problems with a number of other infections. As a result I have developed treatments for the following infections, many of which I have cured myself of.

DISCLAIMER: I do not sell cures. This is spiritual healing:

### Viruses

Epstein Barr Virus, 2 boxes,	£224	shipping extra for all items listed.
H1N1 (swine flu) 12 @ £8	£96	
Coxsackie/Mood virus, 3 boxes	£315	Basic treatment for Coxsackie viruses
Coxsackie A viruses boost	£80	requires Coxsackie/mood virus treatment
Coxsackie B viruses boost 5 @ £8	£40	“ ” “ ” “ ”
Cytomegalo virus core, 1 box	£105	CMV
Cytomegalo virus boosts 1-3 boxes	£105-£315	All 4 boxes normally required
HHV6 7 @ £8	£56	
Human papilloma virus 2 @ \$8	£16	new, may require boosts
Herpes simplex 1	£8	may require boosts
Herpes simplex 2 M/F	£24	May not stand alone
Herpes zoster (shingles)	£8	“ ” “

### Bacteria

Bacteria in general 5 @ £8	£40	
Bartonella 1 box	£105	Upgraded i-treatment
Babesia 8 @ £8	£64	Upgraded i-treatment
Staphylococcus 11 @ £8	£88	
MRSA 14 @ £8	£112	
Streptococcus + CWD 10 @ £8	£80	includes antibiotic resistant strains
Lyme, series A, 20 boxes	Ask	Drug-resistant Lyme extra
Lyme, series B, under development	Ask	Now includes spiritual gold therapy

### Candida & fungal infections

mild 5 @ £8	£40
Medium 10 @ £8	£80
Severe 1 box	£105
Boosts for other fungal infections	Ask

### Multiple Infections

If someone has three or more types of infection (fungal, viral, bacterial or parasites), then these can cause the immune system to start to break down, and I normally suggest they get the MIF treatment: 1 box £105

### Collapse of the Immune system

Some infections cause the immune system to collapse (HIV, TB, Lyme, may be others or multiple infections), so that there starts to be a complete break down. Certain types of chronic disease can also cause its collapse. I have made considerable progress in developing remedies to reverse this, so that the immune system starts to rebuild itself. Triune energy

remedies and colloidal gold now play a key part in this. This is already included as a standard part of the relevant i-treatment.

### **Lung Problems and pneumonia**

Fungal, viral, bacterial & CWD pneumonia £8 each plus boosts

Chlamydia pneumonia 5 @ £8 £40

Other lung problems - I have a huge experience with TB Ask

### **Balance Adrenals**

4 @ £8 £32 Part of HPA treatment

### **Autoimmune Disease**

4 @ £8 £32 related to arthritis treatment

### **Addictions**

3 @ £8 £24

### **Negative Thoughts**

5 @ £8 £40 viruses hide in negative thoughts

### **Guillain Barre Syndrome**

Ask paralysis sometimes caused by EBV

### **Boosts for EBV**

Sinuses & ears 3 @ £8 £24

EBV in Nerves & Brain 7 @ £8 £56

Severe EBV 3 @ £8 £24 also inherited vulnerability to EBV

Joints £8

Muscles £8

Burnout 2 @ £8 £16

Gold therapy 4 @ £8 £32

EBV in digestive tract Ask

Other Ask

### **Treating EBV**

People come to me with EBV problems, but usually there is something else going on, and so the problems are more complicated. Up to 90% of the adult population have EBV, yet most of them do not have any problems from it. Only a few percent have problems, and usually there is a **trigger**, which weakens their immune system and makes them vulnerable to EBV. Then they start to get problems. After some searching they conclude it is EBV. Well yes and no. In fact they often have two diseases, EBV and the trigger, such as stress, burnout, another infection, drugs, pollution, or indigestion. Treating the trigger can be difficult, because some people do not know what it was, and usually it is different from person to person.

The method I have developed is to tailor-make the treatment as follows:

1. The standard EBV treatment
2. Boosts against symptoms specific to the client
3. Treatments against other infections the person has.

If one treats all three aspects, then one usually gets good results. In more detail:

### **Boosts**

EBV causes different effects in different people. For example, some people have problems with their sinuses, Eustachian tubes and/or inner ears. When the virus gets into these places, a booster treatment is required to get it out, otherwise it can claw its way back.

Quite often EBV gets into the brain and nervous system. Symptoms of this can be tinglings, twitching, burnings, altered sense of touch, and/or a skin rash a bit like shingles.

If you have any of these or other signs of the virus in your nervous system, then you need the boost to get it out of your brain and nervous system, because the nervous system plays a key role in controlling the immune system. Some people may require other boosts, such as for the joints, muscles, severe EBV, vulnerability to EBV, inherited EBV, digestive problems caused by EBV, etc.

### **Other infections**

People with EBV frequently have other infections such as Strep or candida, or may be something more serious such as CMV, Coxsackie viruses, or even Lyme. Other infections can weaken your immune system and even block the treatment against EBV, so it is important to get rid of them too. For example, if you had roseola as a child, or otherwise have chronic human herpes virus 6 (HHV6). This small virus can block the EBV treatment. If you have it, then get the treatment for it as well, because it is easy to get rid of.

Strep and staph infections weaken the immune system in the throat area, and so you need to treat these. You also need to treat any other viruses, because they weaken your immune system and so make it harder to get rid of the EBV. Combined treatments against several viruses can often work quite quickly. One woman recently got rid of EBV and CMV in three weeks, using combined treatments against both.

Candida and fungal infections are a sign that the immune system is weak against viruses, because the same white blood cells fight viruses and fungal infections. Therefore if you have any signs of candida or other fungal infections, you need to treat them, to boost your white blood cells against EBV as well.

### **Other Diseases caused by EBV**

EBV is suspected of causing paralysis (Guillain Barre syndrome), multiple sclerosis (MS), breast cancer, sjogren's syndrome, leukaemia, and possibly other conditions. I have cured one case of paralysis (Guillain Barre syndrome) with the treatment against EBV plus major boosts for the immune system and nerves. I have done research into MS and nerve regeneration, and cured MS caused by Lyme. It is possible that EBV also causes MS - I don't know. This is an area of research for those interested.

I have done a lot of research into breast cancer and have a prototype i-treatment. I don't think EBV is a big factor in breast cancer, although it may have a small effect. I have a i-treatment against prostate cancer £80 (it has nothing to do with EBV).

### **Other Infections**

You do not need to have EBV to take my other treatments, which have cured people. It is important to have a strong immune system, because it can also help you in life.

### **Lyme Disease**

I have cured myself of Lyme, but the prototype treatment is long and complicated as is the disease. I have now developed a new version, which is simpler and more powerful.

### **Research and Development**

I am currently doing research into hepatitis C, if you would like to test the prototype treatment. The treatment for prostate cancer I believe is good, but it needs wider testing.

### **Advantages**

My remedies and treatments are non-chemical, non-toxic, natural in origin, and natural in action. They work by bringing in more love and spirit, giving you back control of your body, and pushing out the infection(s). There are several key advantages of my method. They are non-toxic and there are no side effects (although there may be healing reactions). They boost your immune system so that when it is strong enough, the infections are pushed out. So not only has the infection gone, but you have the added advantage that your immune system is stronger than before the infection.

{Disclaimer: results may differ from person to person.}
